Office Action Summary	Application No. 10/824,263	Applicant(s) GAUR ET AL.	
	Examiner Stuart Hendrickson	Art Unit 1754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 1754

The election without traverse is noted. Claims 1-30, 73-100, 102-112 are withdrawn.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 31-72 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Zondlo et al. 5955375.

Zondlo teaches in column 11 making a carbon material by mixing several carbon sources, molding and heating. The heating steps are deemed to perform the adhering, collapsing, etc. as the non-carbon materials and elements are removed from the structure. Zondlo suggests ash removal in column 12. No differences are seen in the product; the examiner is not obligated to find all the process steps of a product-by-process claim.

Claims 31-72 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Ubbelohde 4213956.

The reference teaches in col. 5 and 6 carbonizing two carbon sources, with shaping. No differences are seen in the product; the examiner is not obligated to find all the process steps of a product-by-process claim.

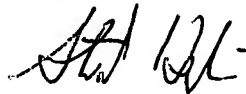

Art Unit: 1754

Claims 31-72 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Morgan 3867499.

The reference teaches in col.4-5 carbonizing two carbon sources (one being the additive), with shaping and void collapse.

No differences are seen in the product; the examiner is not obligated to find all the process steps of a product-by-process claim.
